

Web Accessibility: Use BEM to organize your code

Without BEM

```
<nav id="menu" class="menu-nav">  
  <ul class="list-links">  
    <li id="main-menu-links">  
      <a class="link">  
      </a>  
      <a class="link current_link">  
      </a>  
    </li>  
  </ul>  
</nav>
```

With BEM

```
<nav id="menu" class="menu Block U-margin" >  
  <ul class="menu_list" >  
    <li class="menu_item" >  
      <a class="menu_link" >  
      </a>  
      <a class="menu_link menu--current" >  
      </a>  
    </li>  
  </ul>  
</nav>
```

Modifier

Without BEM

```
<nav id="menu" class="menu-nav">
  <ul class="list-links">
    <li id="main-menu-links">
      <a class="link">
      </a>
      <a class="link current_link">
      </a>
    </li>
  </ul>
</nav>
```

With BEM

```
<nav id="menu" class="menu U-margin">
  <ul class="menu_list">
    <li class="menu_item">
      <a class="menu_link">
      </a>
      <a class="menu_link menu--current">
      </a>
    </li>
  </ul>
</nav>
```
